

*The jewels of
Vaud wines 2019*

*1ers
Grands Crus*

Vins Vaudois

L'EXCELLENCE DES TERROIRS

SELECTION CRITERIA

*Excellence derives
from a meticulous process*

Stringent demands

The Premiers Grands Crus derive from traditional grape varieties : Chasselas, Pinot noir, Gamay, Merlot, Gamaret and Garanoir. Grown in accordance with the rules of integrated production respectful of the environment, their minimum density of 6,000 vines/ha compels the roots to reach far down and therefore account for the wines' remarkable complexity. The age of the vines, at least 7 years, also constitutes an assurance of quality. Yield is not to exceed 0,8 l/m² for Chasselas and 0,64 l/m² for Pinot Noir, Gamay, Merlot, Gamaret and Garanoir.

The value of time

The history of an estate and its know-how are key to obtaining the Premier Grand Cru designation. But time also bears witness to these wines. With age, they develop a harmonious texture with intense and persistent aromas, perfectly suitable to foster their excellent aging potential over time. This capacity to produce consistent premier quality justifies their place at the top of the hierarchy of Vaud wines.

Grape picking by hand

This caring method allows for a stringent and precise process which facilitates the selection of grapes according to their maturity. Minimum sugar content must be no less than 75° Oe (Oechsle) for Chasselas, 80° Oe for Gamay and 85° Oe for Pinot Noir, Merlot, Gamaret and Garanoir.

Unique terroirs

The Pays de Vaud is blessed with a rich variety of soils. From the clay/limestone hillsides to the alluvial deposits of the shores of Lake Geneva, as well as the marl/limestone soils at the foot of the Jura mountains, these particular terroirs are in perfect harmony with the grape varieties that grow there. They deliver to the wines the distinct and typical mineral character of their place of origin. The Premier Grand Cru designation certifies that the grape derives 100% from the same terroir.

Vintage certification

When all criteria are met, the wine will be presented to the Premiers Grands Crus Commission, which will decide whether or not to award the prestigious designation. Such certification is to be confirmed for each vintage following inspection of the vines and renewed tasting.

LES COTTES

Begnins

Occupying the estate's prime parcel, the Les Cottés vines are grown on bench terraces built in 1985 to prevent erosion that would otherwise affect the steep slopes at the Luins production site.

The site's morainial soil with moderate gravel content allows the roots to penetrate adequately and therefore guarantees a regular supply of nutrients to the vines.

The vineyard map of 1786 illustrates that the perimeter of today's estate has not changed since the area was under Bernese control.

CHÂTEAU LE ROSEY

Bursins

This 13th century Château estate on the upper parts of the village of Bursins produces 15 cuvée wines grown on 4.5 ha of single-variety vineyards at the foot of the Jura mountains. Biodynamic certification of the entire estate and Premier Grand Cru designation of our Garanoir variety proved indispensable to recognize the true identity of our terroir. The result of the pollination of Gamay and Reichensteiner, this Swiss variety combines hints of black currant, blueberry and violet with an elegant fullness on the palate, thus typifying the complexity and grandeur of a Premier Grand Cru.

AU FOSSEAU

Vinzel

Due to the very light soil it occupies, Au Fosseau is known to produce very robust wines with notes of honey that can be kept several decades.

Since 1994 this estate has embraced biodynamics, a method which bans the use of chemicals, herbicides and artificial fertilizers. Respectful of its natural environment, it allows the vine to lower its roots deep and therefore to draw from the soil's riches. Sulfites and chaptalization are very limited.

CHÂTEAU LA BÂTIE

Vinzel

The Premier Grand Cru of the Château La Bâtie embodies the elegance of a magnificent estate of 10 contiguous hectares of closely spaced hillside vines above Vinzel in view of the Mont Blanc.

Full of charm and steeped in history, this bastide was founded in the Middle Ages and rests upon two ancient vaulted wine cellars, among the canton's largest. It is one of the jewels of the Vinzel AOC.

CHÂTEAU DE VINZEL

Vinzel

Built in the 17th century, the Château de Vinzel served at the time as a country estate for a magistrate who came to inspect his vineyard and collect taxes when the area was under Bernese control. Surrounding the structure, the vineyard extends half-way up the hillside thus ensuring outstanding exposure. Not only does the gravelly soil contribute to the wine's quality, its unique features are further enhanced as a result of meticulous growing techniques respectful of the environment.

Aged in oak barrels on the Château de Vinzel estate, the Chasselas stands out due to its finesse, elegance, expression of the terroir and its great aging potential.

CHÂTEAU SAINT-VINCENT

Gilly

Straddling the imposing Château, this remarkable contiguous vineyard located in the heart of the La Côte wine region was first mentioned in a charter dating back to the late 9th century.

It is believed to be named in honor of Saint Vincent of Saragossa, patron saint of the vintners and venerated on January 22. Its clay-limestone terroir and southern exposure facing Lake Geneva are some of the essential qualities which combine to produce a Premier Grand Cru.

CHÂTEAU DE CHÂTAGNERÉAZ

Mont-sur-Rolle

The vineyard of this ancient patrician residence extends over hillsides enjoying a remarkable exposure and sunshine.

Stringent production management allows the estate's wines to be an expression of the land on which they are grown and of their distinct features, i.e. their body and structure.

ES CORDELIÈRES

Mont-sur-Rolle

The Premiers Grands Crus grapes are produced by vines that are more than 30 years old with very limited yield. They are pressed and cellared on the property.

With glaciofluvial deposits making up the ground moraine bedrock, the estate's terroir features a silty clay/loam texture. Deep down, its heavy and compact soils are able to maintain a significant supply of water thus providing for an adequate irrigation of the vines, even in the event of drought.

CHÂTEAU DE MONT

Mont-sur-Rolle

The Chasselas of Château de Mont expresses the full finesse of this magnificent estate overlooking Lake Geneva. Picked by hand, it ages delicately in the Château's cellars.

Château de Mont is one of the oldest wine estates within the Mont-sur-Rolle place of production. Today, the vineyard covers an area of 13 hectares. The vines benefit from full southern exposure on a 12-40 % slope.

DOMAINE DE AUTECOUR

Mont-sur-Rolle

The Autecour estate in the village of Mont-sur-Rolle overlooks the La Côte wine region and derives its name from the 13th century French “altacort”, meaning “upper farmyard”. With rows of vines closely spaced, the vineyard is characterized by high planting density.

Aging in wooden vats in the estate’s cellars contributes to showcase the quality of the harvest and to preserve the terroir’s original expression.

DOMAINE DE CROCHET

Mont-sur-Rolle

This historical 10-hectare estate is recognized as a pioneer producer in terms of the diversity of grape varieties it produces. The reputation of its wines is due to a remarkable terroir which meets all the quality standards of a Premier Grand Cru. Derived from winegrowing methods that are respectful of the environment, the Merlot it produces yields a noble and complex lineage wine with ideal aging potential.

AU BREZ

Féchy

Registered as part of the Federal Inventory of Landscapes, Natural Sites and Monuments of National Importance, Au Brez occupies a contiguous parcel cultivated in compliance with very stringent principles of sustainable growth. The distinct characteristics of the land derive from a complete shaving of the soil due to the withdrawal of the Rhone glacier. The estate's soil is composed of limestone with a medium clay texture. Though rather deep, it is easily reached by the vine's roots and rests on a marl compacted by the glacier.

DOMAINE DE FISCHER

Féchy

This magnificent historical estate is located on a hillside overlooking Lake Geneva. Surrounding the massive home, the vineyard predominantly features the noble Chasselas grape variety.

Combining fullness and complexity, this Premier Grand Cru has earned its reputation over a very long time. Vinified in massive barrels made of ancient oak, this Chasselas is reputed for its proven aging potential.

CHÂTEAU DE MALESSERT

Féchy

The history of Château de Malessert and its estate goes back more than a thousand years.

Cultivated on a particular 15,000 m² parcel, the Premier Grand Cru of Château de Malessert originates in the most sun-drenched area of La Côte in a region dominated by vines.

Vinification is practiced according to the traditional method, at controlled temperature in modern facilities.

DOMAINE DU MARTHERAY

Féchy

This exceptional wine derives from a selection of the estate's premier Chasselas parcels located in the heart of Féchy. Naturally, the yield is limited as the parcel is perched on a steep limestone slope. Following vinification in large solid-oak barrels for nearly one year, the wine is bottled then stored for two years before its release.

Each bottle of this powerful and elegant Premier Grand Cru is numbered to underscore the wine's unique character.

DÉZALEY (La Gueniettaz)

Ideally located in the Dézaley vineyard, La Gueniettaz is reputed for its structured and elegant wines. Its exposure facing the lake as well as the heat stored in the walls of the terraced vineyards allow the grapes to reach exceptional maturity each year.

La Gueniettaz is the first representative of the prestigious Dézaley appellation to be designated Premier Grand Cru. This constitutes a tremendous opportunity to showcase the potential of this sumptuous terroir.

CHÂTEAU DE MONTAGNY Villette

Flanking the Château whose existence can be traced back to the early 10th century, the 3.4 hectare estate within the Villette appellation is one of the gems in Lavaux. Positioned on one of the many terraces of Lavaux, “caught” between the blue skies and the lake’s blue waters, the Château and its vineyard benefit from an exposure that is exceptional.

The Chasselas of this Premier Grand Cru is vinified in the château’s ancient oak barrels, which give it its distinct flavor.

CLOS DES ABBAYES

Dézaley

With growth and retreat following in succession during the past one million years, the Rhone glacier helped shape the Dézaley terroir. Following the last ice age, a glacial moraine was left behind to form a clay-limestone substrate.

This parcel's clay and limestone soil accounts for the wine's characteristic richness. Its aromatic potential derives from the slope of the hillside, from a multitude of supporting stone walls, as well as from the lake's reflection below.

DOMAINE DU BURIGNON

Saint-Saphorin

Located east of the Domaine du Burignon, the parcel which produces this Premier Grand Cru is dominated by a large flat rock. Flanked by the reputed walls of Lavaux, the vineyard's average slope is in excess of 35%. The glacial, sandy and light soil provides for deep rooting thus magnifying the terroir's distinct expression.

When maturity reaches perfection, the grapes are picked manually. Following partial malolactic fermentation, the wine is aged seven months in wooden vats.

CHÂTEAU DE CHARDONNE

Chardonne

Château de Chardonne, ideally exposed below the village of Chardonne, benefits from a microclimate with maximum sunshine. With slopes oriented south/southeast, their average incline is 35%.

The vines are cultivated by by Antonio Figliola and undergo inspection by the Confrérie des Vignerons (Winegrowers' Brotherhood) in Vevey.

This skilled winegrower is one of the winners of the 2019 Fête des Vignerons (Winegrowers' Festival). Vinification takes place the traditional way, followed by aging in oak barrels.

CLOS DE LA GEORGE

Yvorne

Entirely enclosed by walls, this prestigious estate covers 8 hectares of terraced vineyards. With its vines facing the Dents du Midi mountains and drenched by sunshine from morning until evening, the exposure is perfect.

Naturally, the Chasselas reigns supreme in this exceptional terroir. Aged in a magnificent cellar hewn out of the rock, this mineral and complex Chasselas is the epitome of a Premier Grand Cru.

CLOS DE L'ABBAYE

Yvorne

Located west of the village of Yvorne on the lower hillside, the vines of the Clos de l'Abbaye grow in gravelly soil on a Liassic limestone base marked by clay veins.

A steep slope fosters natural drainage of the water while the subsoil maintains controlled humidity, which fosters harmonious maturing and freshness of the wines. Cultivated on terraces, the vines are surrounded by masonry walls delineating the Clos de l'Abbaye.

L'OVAILLE

Yvorne

This reputed historical terroir on a scree hillside dating back to 1584 is one of the jewels among Swiss vineyards. Planted with the Chasselas vineyards, L'Ovaille overlooks Yvorne from its precipitous terraces.

Derived from winegrowing methods that are respectful of the environment, the Chasselas vinified in amphora yields a noble and mineral lineage wine with ideal aging potential.

L'OVAILLE

Yvorne

On March 4, 1584, an enormous rockslide caused by an earthquake plunged down from the Plan-Falcon rocky amphitheater above Corbeyrier to reach the Rhône valley floor after burying the village of Yvorne.

This disaster caused a wide alluvial cone to be formed in the northwestern part of Yvorne.

This is where the famous Ovaille vineyard took foothold. Indeed, its name derives from the old French "orvaille", meaning "disaster, catastrophe, devastation".

CLOS MAIJOZ

Aigle

Owner of the vines grown since
the 17th century and located mostly
within its boundaries, the town of Aigle
has designated Clos Maijoz
as its wine of honor.

This excellent Chasselas derives
from a special enclosed parcel and
benefits from a unique and meticulous
vinification process begun in 2011.

Limited production.
